   - Chart updates: 500ms value transitions

3. RESPONSIVE DESIGN:
   - Mobile (<768px): Full-width cards, stacked layout, bottom nav
   - Tablet (768-1024px): 2-column grids where applicable
   - Desktop (>1024px): Full multi-column layouts
   - Tables → Cards on mobile (one entry per card)

4. ACCESSIBILITY:
   - ARIA labels on buttons
   - Semantic HTML

```
  - Keyboard navigation (Tab, Enter, Escape)
  - Visible focus indicators (cyan border)
  - Color + text for status
  - Sufficient contrast ratios (WCAG AA)

=== KEEP EXISTING ===

✓ All functionality (add, edit, delete)
✓ Data persistence (localStorage)
✓ All calculations (P&L, net worth, budgets)
✓ All charts (with improved styling)
✓ Form validation
✓ Dark theme (improved)
✓ Mobile responsive
✓ All data features (export, import)

=== BUILD THIS NOW ===

Create a production-ready, professional finance app that:
- Looks like LedgerZero (professional appearance)
- Has excellent UX (forms collapsed, data first)
- Is fully responsive (mobile, tablet, desktop)
- Has smooth animations
- Is completely functional
- Has no console errors
- Follows all specifications above

This should be your FINAL redesign - make it perfect.

📞 IF SOMETHING NEEDS FIXING

Issue: Forms still expanded by default

```
"The add/income/expense forms are expanded by default. They should be
COLLAPSED by default. When user clicks [+] button, they expand smoothly
with animation. Please fix."
```

Issue: Charts still cramped

```
"The charts don't have proper spacing. Please add:
- 24px padding inside chart container
- 32px margin between chart sections
- Clear titles above each chart
- Legend below charts
- Better organization overall"
```

Issue: Settings still cluttered

```
"Settings tab still feels disorganized. Please reorganize into clear sections:
1. Quick Stats (4 cards)
2. Display Preferences
3. Data & Backup (prominent Export/Import)
4. Budget Management
5. Connected Accounts (placeholder)
6. Danger Zone
7. Help & About

Each section should have background separation."
```
